RGF AND BEIJING UST ENTER INTO STRATEGIC PARTNERSHIP WITH JACKIE CHAN SPARKLER ROLL INTERNATIONAL CINEMA GROUP

West Palm Beach, FL – Ron Fink, President of RGF Environmental Group, Inc. www.rgf.com announced that RGF and its authorized distributor Beijing UST Tech have entered to a Strategic Partnership with Beijing Sparkler Roll International *d/b/a Jackie Chan International Theater* Group to supply, on an exclusive turnkey basis, indoor air purification systems utilizing RGF's proprietary patent pending Photohydroionization (PHI) technology and design for Sparkler Roll's high end cinema multiplexes throughout China.

The Jackie Chan International Theater was designed after U.S. multiplex cinemas as the demand for high end U.S. made products, technologies and lifestyle has become rampant in China. Beijing Sparkler Roll's management team sought out RGF via our distributor specifically for our experience and renowned reputation as a high level American environmental technology designer. *"It is amazing that many large Chinese companies such as Beijing Sparkler Roll are now seeking out RGF, a small manufacturing company in Palm Beach Florida, making us one of the premiere suppliers of advanced air purification technology to China", stated Ron Fink, President and CEO of RGF.*

The first cinema, *Jackie Chan* International Cinema, located in Changzhou, held its grand opening in November 2010, and was the first of many cinema multiplexes being planned and built over the next several years. The grand opening ceremony was personally attended by many luminaries including renowned actor Jackie Chan, partner in Beijing Sparkler Roll as well as Andrew Wang, President of Beijing UST Tech and Sharon Rinehimer, Vice President/General Counsel of RGF (*photo below*). RGF and Beijing UST will work closely with Beijing Sparkler Roll to continue providing sales support, installation and after-market service to provide the best indoor air quality for their cinema clientele.

RGF's PHI technology http://www.rgf.com/air_purifier.cfm is a unique induct indoor air quality product that provides low energy air purification that has been proven to kill mold, odors, bacteria, and 88% of an airborne sneeze at three feet; also, VOCs, viruses and up to 99% of MRSA, H1N1 and the Norwalk Virus, to name a few.

RGF manufactures over 500 environmental products providing the world with the safest air, water and food without the use of chemicals. RGF has sold over one million PHI cells in 33 countries.
